

ARCHES SET OF 5

Please check that you have all parts. (Located in attached bag)

- 1 pkg of color clips (replacement)
- 5 wing bolts and wing nuts

1. There are 4 square tube pieces with no lights on them that go along the ground 2 short and 2 long. Each long and short piece go together to create 2 long bars for each side of the arch.
2. The long ground bars have 5 small stubs on each side (total of 10) Starting with a straight bar that has a male plug, attach each straight bar to the small stubs on the ground bars. Make sure they will be able to be plugged end to end, male to female.
3. Attach half arches (total of 10) to straight bars, again making sure the male to female plugs will attach to each other end to end.
4. Using a ladder, attach the metal rods(total of 4) with washers on the ends, to each arch with a wing bolts and nuts provided.
5. Plug male plug to an extension cord.
6. For best look, straighten clips.

Arch Frame set up

Note: Arch can be set up with male plug on left side if needed. Pictured here on the right
